- Android and iOS application
- Cell phones, tablets, desktop computers or laptops
- Link to LockPlus via Bluetooth
- Verifies Open and Closed Seal
- Prevents second safe opening until Closed Seal received
- Disable and authorize Users via portal
- In-depth audit with time, date and user information
- Online and offline operation
- Unlimited # of Users
- Scheduled, time-limited and date-based access control
- Two-Year Warranty
- Components sourced from Allied countries
- Assembled and tested in Kentucky, USA

Who is the Ideal User?

Banks, Jewelry Stores, Chain Operations, or any business with multiple locations and/or users. LockPlus allows real-time control over multiple locations and users from a central location.

What is the Core Purpose?

LockPlus delivers full control over locks and protected assets. One-time codes prevent re-entry. Closed Seal confirmation verifies the lock is secured. Route access requires a confirmed close before the next location can be unlocked. Users can be added or disabled at any time through the portal, giving management complete control over security and access.

What problem does it solve?

- LockPlus is simple and easy to install.
- Data and power wiring not required. The lock is battery powered.
- Support for an unlimited number of users.
- Management of all locks from anywhere, anytime.

What are the Key Differentiators?

- No power or data wiring required
- OTC and Static Code capability
- Competitively Priced
- Ease of Installation
- QSecurity offers hosting on US servers

Ready to secure what matters most? Schedule a consultation with QSecurity and move forward with confidence.
